

# BUSINESS IDEA FORM REQUEST FOR INFORMATION (RFI)

Thank you for your interest in Utah Tech Labs and our services. This RFI is intended to gather information about your specific needs and requirements to help us understand your project better and provide you with a tailored solution.

---

## Company Background

Briefly describe your company, its industry, and its target audience.

What are your company's main goals and objectives?

## Project Description

Briefly describe the product/solution you are looking to develop.

What problem are you trying to solve with this product?

Are there any existing product available in market that inspire your vision?

Do you have any existing user stories or functionalities in mind?

## Technical Requirements

Do you have any specific technical requirements (e.g., preferred programming languages, platforms, databases)?

Are there any existing or third-party APIs or integrations you need to consider?

## **Timeline and Budget**

Do you have a desired timeframe for completion of this project?

Is there a preliminary budget allocated for this project?

# NEXT STEPS

Once you have completed this RFI, please email it to [info@utahtechlabs.com](mailto:info@utahtechlabs.com).

We will review your information and contact you to discuss your project further.

---

## Confidentiality

All information provided in this RFI will be kept confidential by Utah Tech Labs. We sign an NDA to make sure any information we share with each other is protected.

## About Utah Tech Labs

At UtahTech Labs, we operate with a core philosophy: to help our clients succeed by leveraging the power of technology. This belief guides every action we take. Before making any decisions, we ask ourselves one critical question: "Will it benefit our customers in conducting their business more effectively?" If the answer is no, we eliminate the option and focus on the essentials. This approach helps us to streamline our efforts and concentrate on what's most important, resulting in our clients' success.

- We specialize in assisting established enterprises in streamlining their operations, integrating automation to reduce manual tasks, and offering advanced reporting for real-time business insights.
- For small brick-and-mortar businesses, we develop digital strategies to enhance their online presence, expanding their reach affordably.
- We collaborate with innovators to transform their concepts into tangible products.

Thank you for your time and consideration.  
By responding to this RFI, you acknowledge that you have read and understood this document.
